April Showers and May Flowers

The inevitable sunny days of summer are quickly approaching. Key word here is sun! Right now, rain showers bring a slight reprieve from the tortuous sun rays, but it won't last for too long. Once the temperatures rise, they won't be coming down for quite some time. We're used to it in Louisiana, but it doesn't make it any easier.

As a reminder, the 2025 APGA/LPGA Summer Convention room block and registration are officially open! Please make plans to join us at the Perdido Beach Resort in Orange Beach, AL June 29-July 1. You should have received an email with detailed information and links. You can also find the full brochure at the end of this month's newsletter.

PERC is committed to supporting a culture of safety throughout the propane industry. Join members of the safety and training team for PERC Safety Office Hours, a monthly series of webinars where the team will answer safety and training questions and provide updates.

The webinars will be held on the last Thursday of each month, beginning April 24. Register below and come ready with your questions about the PEP transition, trends in safety, training needs, and all other things safety- and training-related. REGISTER NOW: https://propane.zoom.us/webinar/register/WN_CQb13zkhTMGu7c5hUuTjYA#/registration.

As always, if you have any questions or need any information regarding the association, please contact the LPGA office at 225-763-8922 or email our Executive Director Randy Hayden at randy@ccilouisiana.com.

Give us a call...

2025 Calendar of Events

June 8-10: NPGA Propane Days, Hilton Washington DC Capitol Hill.

June 29-July 1: APGA-LPGA Annual Summer Convention, Perdido Beach Resort-Orange Beach, Alabama.

June 30: Second Quarter Board of Directors Meeting, Perdido Beach Resort-Orange Beach, AL.

September 2025: Third Quarter Board of Directors Meeting, Date and Location TBD.

November 6-7: Leadership Summit, Dupont Circle Hotel-Washington, DC.

December 2025: Fourth Quarter Board of Directors Meeting, Date and Location TBD.

New Executive Order: Protecting American Energy from State Overreach

On April 8, 2025, the White House issued a new Executive Order, "Protecting American Energy from State Overreach." It directs the U.S. Attorney General to "identify all State and local laws, regulations, causes of action, policies, and practices...burdening the identification, development, siting, production, or use of domestic energy resources that are or may be unconstitutional, preempted by Federal law, or otherwise unenforceable." This process will prioritize state and local laws, policies, and practices "purporting to address 'climate change' or involving 'environmental, social, and governance' initiatives, 'environmental justice,' carbon or 'greenhouse gas' emissions, and funds to collect carbon penalties or carbon taxes."

The National Propane Gas Association (NPGA) is in direct communications with the White House related to this critical order. NPGA is crafting a state-by-state list of laws and regulations it feels the U.S. Attorney General's office should review and seek to revoke. NPGA will then, to the extent permitted, work with the Attorney General's office as it seeks to roll back, via litigation or otherwise, any such burdensome and unconstitutional laws.

This work will be a very top priority for NPGA in the coming days, weeks, and months. For further information, contact NPGA's President & CEO, Stephen Kaminski at Skaminski@npga.org.

Power Gen

There has never been a better time to explore the vast opportunities for your company to grow gallons through propane power generation. Every day, we hear about the mounting challenges and limitations of the electric grid. With increasing costs associated with improving grid infrastructure and the rising price per kilowatt, it's becoming more evident that propane power generation presents a viable and sustainable solution for addressing these concerns. America's energy demand is quickly outpacing supply, and as a result, energy is only becoming more strained and expensive. Additionally, the frequency and intensity of severe weather events are on the rise, further amplifying the economic impacts on energy systems.

In light of these challenges, propane power generation offers an innovative and practical opportunity to fill the gap, not only in terms of energy generation but also to grow your company's gallon sales. Whether in residential, commercial, industrial, agriculture, or on-road markets, technologies that use propane for power generation are available and ready to provide much-needed solutions for your customers. This opens the door for your company to expand its footprint and increase gallon sales while helping customers address their energy challenges in a cost-effective, reliable way.

From standby power systems to prime power generation, propane can meet the needs of virtually every application. Whether the need is for small-scale mobile solutions or large-scale combined heat and power systems, propane has a solution that can make a significant impact.

The good news is that we don't have to wait to start making a difference. Many of the energy targets set for 2030 and beyond can be achieved right now, and propane power generation is the ideal solution to help meet these ambitious goals. Moreover, propane is a low-impact energy source that can be deployed responsibly. It's abundant, environmentally friendly, and, most importantly, incredibly resilient. In a world where energy security and sustainability are becoming increasingly critical, propane provides a dependable and efficient energy solution for a variety of applications, making it an invaluable resource for both businesses and customers alike.

This is an exciting time to be part of the propane industry, with the potential to support communities,

businesses, and industries in their transition to cleaner, more resilient energy solutions.

Please visit propane.com/providers and explore the Power Generation page under the section Take Action to Grow Your Gallons for resources you can use today.

April Safety Tip of the Week from PERC

•**Week 14 (April 7th)** – Keep Consumers Up to Date: Just as it's important for propane workers to keep up to date with the latest safety information, the same is equally true for consumers. PERC's newly updated consumer safety materials are a great way to effectively and easily educate customers on how to use propane while staying safe and informed.

•**Week 15 (April 14th)** – Vehicle Parking & Security: Before parking a bobtail in a public garage or other building, ensure that: All liquid is purged from the cargo tank, piping, pump, meter hoses and other equipment; The vapor pressure in the piping, pump, meter delivery hose, and related equipment is reduced to approximately zero; and All valves are closed, and the delivery hose or valve outlets are plugged or capped.

•**Week 16 (April 21st)** – OSHA Requirements for Labels in Revised Hazard Communication Standard: Information about chemical hazards be conveyed on labels using quick visual notations that provide immediate recognition of hazards. The labels also must provide instructions on how to handle the chemical so that users are informed about how to protect themselves.

•**Week 17 (April 28th)** – Understanding the Safety Data Sheet (SDS): A Safety Data Sheet (SDS) provides information about a chemical's hazards. Anyone who might come into contact with the chemical should understand the potential dangers and how to safely handle the product.

Propane is Leading the Charge

Propane is revolutionizing power generation by providing clean, reliable, and resilient energy across the U.S. Whether for portable power on job sites, prime or backup power for homes and businesses, or EV charging systems to keep fleets running, propane delivers performance and scalability to projects of any size.

PROPANE SOLUTIONS FOR A MORE RESILIENT FUTURE

As the cost of electricity and the potential for power outages continue to rise, use this sales sheet to help your customers discover the many propane power generation applications that they can depend on to get their jobs done safely, affordably, and with minimal environmental impacts.

Hope for the future of energy — today

By: *Randy Hayden, Executive Director-LPGA*

Discussions about climate change and energy choices are complex, difficult, and often polarizing. Here's something we can all get behind: a feel-good story about the future of energy on Earth Day. Many cities, businesses, and homeowners are already helping to dramatically lessen their impact on the environment today with clean, reliable propane.

At the same time, propane enhances resilience when disaster strikes. Propane provides on-site power generation for electricity and energy for heating and cooking when the electric grid is compromised. Emergency responders rely on propane equipment during rescue and recovery efforts.

Here in Louisiana, propane is used for more than just your springtime crawfish boils. Propane is used in school buses, delivery trucks and homes. 10 School districts, including East Baton Rouge and Lafayette parishes, have approximately 268 school buses running on propane autogas on our roads. UPS has several propane-powered delivery trucks on the roads of Louisiana, as well.

As a low-carbon energy source, propane produces significantly fewer greenhouse gas emissions than other energy types like diesel, gasoline, and electricity. Unlike diesel and gasoline, propane emits virtually no particulate matter, resulting in cleaner air and healthier communities.

Propane is also nontoxic and won't contaminate soil or groundwater, making it a trusted energy source in sensitive environments with delicate ecosystems. Propane is trusted on the farms that feed our nation, helping growers meet sustainability goals and increase yields.

The best part about propane's environmental story is that it is already working today across the country in a wide range of uses because it's portable, reliable, safe, and affordable. Propane powers homes, agricultural equipment, commercial fleet vehicles, material handling equipment, and even school buses. Better yet, it's a domestic energy, with more than 90 percent of U.S. propane supplies produced in the United States.

Propane must remain an integral part of the larger clean energy solution for several reasons. It works together

with other renewable and clean energy sources for added positive environmental impact. Around the world, and right here in our community, propane is providing the energy to help users meet emissions reductions goals — for a fraction of the investment of the alternatives.

The low-carbon propane we use today is going to get even more clean with each passing Earth Day, too.

Register Today: Board of Directors Meeting & Propane Days

Register Today: Board of Directors Meeting & Propane Days All NPGA members are invited to Propane Days, June 8-10, in Washington, DC. The Propane Days 2025 Preliminary Agenda is packed with important activities, including NPGA's Annual and Board of Directors Meeting, policy updates from a range of experts, in-person NPGA member meetings on Capitol Hill, and a Congressional Reception on June 10.

Register today to get the best rate! The early bird registration fee of \$129 is available until May 16; the fee increases to \$179 on May 17.

Book your accommodations at the Hilton Washington DC Capitol Hill Hotel, the headquarters hotel for Propane Days located at 525 New Jersey Ave, NW, Washington, D.C. 20001. Click [here](#) or contact Hilton reservations directly at 1-800-445-8667 and request the NPGA group rate of \$359 single/double occupancy, plus tax. The room block will be available until Thursday, May 15 or until the block is sold out.

Questions? Contact Executive Assistant Nancy Padilla at Npadilla@npga.org.

Clean Energy for Earth Day and Every Day

Everyone deserves access to energy – everyone. And whether it's used to heat a home, power a farm, or fuel a school bus, propane is the environmentally friendly energy for everyone. That's because propane produces far fewer emissions than diesel, gasoline, or even electricity. In fact, using propane produces 43% fewer greenhouse gas emissions than an equivalent amount of grid electricity.

On Earth Day or any other day, that's what makes propane the energy for everyone.

See how propane is powering the path to a zero emissions future at propane.com/environment.

Propane Education & Research Council

PROPANE IS THE IDEAL FUEL FOR POWER GENERATION

Propane offers scalability and performance to power any size of project or business.

The same propane powering a standby generator or Micro-CHP can also power other major appliances

Propane is non-toxic. It does not contaminate soil or groundwater.

Propane generators are 98 percent cleaner than diesel-fueled equivalents.

Propane doesn't degrade over time, unlike diesel or gasoline, making it an ideal standby power fuel.

Residential, commercial, industrial, agriculture, and on road markets all have technologies available that can make an impact and provide solutions to your customers.

Tracy Wells

A MAKEEN Energy Company

Right Sizing Generators

Optimizing Propane Use for Savings

Propane standby generators, permanently installed in a home, are a vital piece of equipment for homeowners. Across the country, we see an increase in power outages due to strain on the electric grid or extreme weather. When power is lost, an installed generator can turn on within 10 seconds via an automatic transfer switch, so heating, cooling, lighting, and refrigeration are not disrupted.

Propane makes homes more resilient during a power outage because homeowners do not have to completely rely on the electric grid for power generation. Homeowners can use propane instead of, or alongside electricity, for space heating, water heating, and appliances such as stoves and dryers. For additional protection, permanently installed generators provide a quiet, efficient, clean source of power that can operate for weeks until power is restored, keeping your clients safe, secure, and comfortable.

Why Right-Size Generators for Residential Builds?

As a residential builder incorporating propane generators into your design plans, it is key to work with the generator manufacturer and possibly the local propane distributor to ensure the generator is sized right for the application. Many propane retailers also sell equipment, so you may wish to visit their showroom to get an in-person look at your options.

Right-sizing a generator will require calculating the generator power or total wattage required based on the appliances and systems it will power. Portable generators are best for powering critical appliances and max out around 17 kW — they are ideal for emergency backup power and recreational use. Standby generators are installed and permanently hardwired to the home and can power the entire home if sized properly. They monitor for power outages and automatically turn on when needed. Standby generators for residential use are available up to 48 kW.

When critical systems such as space heating and water heating are fueled by propane or natural gas, the standby generator can typically be downsized — and made more affordable — because it isn't running power-hungry electrical heating appliances. For example, an all-electric home will require a much larger

generator that can generate more energy. But a smaller generator will work well in a residence with multiple energy sources such as electricity alongside propane water heating, space heating, and cooking equipment because the electrical demand is not so large. A furnace running on propane uses minimal electricity to power the blower motor.

Until recently, homeowners who wanted reliable power had to choose a few select applications that would remain running during a power disruption to avoid overloading the generator and burning it out. But improved generator load-monitoring technology makes it possible to keep power flowing throughout a home even as demand surges and shifts. If a generator gets to the point of overloading, the computerized load monitoring system that comes built into the switch will automatically shut off non-essential appliances and bring them back on when demand subsides. This provides a compromise to larger liquid-cooled solutions, although you give up some of the “all on” capabilities.

Performing an Energy-Consumption Audit

To calculate the correct size of generator needed, you must know the following:

- Square footage of the home.
- Central air conditioner size, in BTUs or tons. Air conditioners use the most wattage of any other appliance, so the generator must be able to handle the AC load when required.
- Whether you want to power the whole house during a power outage or specific appliances. The more appliances you want to use, the greater demand for electricity, therefore the bigger the generator you will need.
- Again, electric appliances such as a water heater, dryer, and range will add to the load required.
- Running vs. starting wattage.

Calculating running vs. starting wattage

To calculate running wattage, first add all the “running watts” for appliances that will be powered by the generator. This number will be the total running watts. Next, add the single highest starting watts out of the appliances you want to power. These are appliances

such as furnaces, refrigerators, and sump pumps that require an extra boost of power when they turn on. The starting wattage may be up to 3x the running wattage. Finally, add the total running wattage and the highest starting wattage from an individual item to get the total starting watts needed.

1,500 SQ FT Residence – Example Energy Demands and Generator Needs

In different climate zones across the U.S., all-electric homes require generators anywhere from one-third to twice as powerful and expensive as homes using both electricity and propane. For customers interested in whole-home standby power, choosing propane appliances where possible such as a water heater, furnace, cooking appliance, and clothes dryer will allow them to cut the capacity and cost of their whole home generator, compared with an all-electric home. This can equate to thousands of dollars in savings. In a 1,500 square foot residence, a home run on propane can operate on a 14 kW generator at an approximate cost of \$4,867, whereas an all-electric home requires a 22 kW generator at an approximate cost of \$6,247. *Note that there are many variables to consider and this example is only provided to give an idea of varying

energy demands in a similar sized residence and how they can impact generator size.

Resilient Propane Standby Generators

Now that you know how to right-size a generator based on the energy use in a home, you can help clients understand the importance of emergency power and choose a propane standby generator ideal for their needs. Installed and permanently hardwired propane standby generators contribute to resilient design and will keep their heating, cooling, lighting, and refrigeration running without disruption.

Complete the 2024 Annual Retail Sales Report.

Annually PERC asks for propane retailer participation in the Annual Retail Propane Sales Report. This information is vital to helping PERC and the industry understand market trends across the propane industry and the evolving needs of individual retailers of odorized propane. It will also ensure that each state receives an accurate amount of state rebate funding from PERC to support vital local projects that impact safety, training, and growth.

▶ Submitting your report is easier than ever. Your responses will be kept confidential – go to propane.com/salesreport to get started.

**PARTY
LIKE IT'S
1776!**

**AT ALABAMA / LOUISIANA
PROPANE GAS ASSOCIATIONS'**

**2025 SUMMER
CONVENTION**

**JUNE 29 -
JULY 1,
2025**

**PERDIDO BEACH
RESORT
ORANGE BEACH, AL.**

CONVENTION INFORMATION

Get ready to party like it's 1776 at the Alabama/Louisiana Propane Gas Associations' joint Summer Convention at Perdido Beach Resort in Orange Beach, Alabama, from June 29 - July 1, 2025. This year, we're not only celebrating our industry and America's birthday but also Randy Hayden's last hoorah with us. It's a chance to strengthen connections and honor the spirit of liberty and unity that shaped our nation.

KENNY LUCERO

LPGA President

With a full schedule of seminars, meetings, and activities, this convention offers plenty of opportunities to network, learn, and have fun. Don't miss out on this historic event to celebrate freedom, knowledge, and the American spirit while making memories with Randy. Pack up, head our way, and join us for an unforgettable time! We can't wait to see you there!

BUBBA QUICK

APGA President

SUNDAY WELCOME

The convention will begin Sunday evening with a Welcome Reception, hosted by Supplier Members from both states. Enjoy light hors d'oeuvres and drinks before you're free to explore the evening, grab dinner, and reconnect with fellow members. And don't forget, the Hospitality Suite will be open for you to relax, take in the view, and share your thoughts with others!

MONDAY SEMINARS/MEETINGS

JOINT SEMINARS

- ***NPGA ISSUES OF IMPORTANCE***

STEVE KAMINSKI, NPGA PRESIDENT AND CEO

The membership will be provided with an update on issues of importance that NPGA is currently addressing for the propane industry.

- ***PERC UPDATE***

BRYAN CORDILL, DIRECTOR, RESIDENTIAL BUSINESS DEVELOPMENT

Bryan has been invited to speak on the development of residential and commercial business. He will provide members with an update on PERC's most recent programs and resource offerings.

- ***TARIFFS- NATIONAL UPDATE***

STEVE KAMINSKI, NPGA PRESIDENT AND CEO

Steve will summarize the purpose and impact of tariffs, covering key topics like their economic effects, trade relations, and potential outcomes. If time allows, he may touch on related issues like trade agreements or global economic policies.

ASSOCIATION MEETINGS

After the joint seminars, each state will hold its respective meetings separately.

Alabama: Annual General Membership/Board of Directors Meeting

Louisiana: Committee Meetings and General Membership/Board of Directors Meeting

Showcase your brand at our conference with a fun, unmanned exhibitor table! For just \$100, your display will be up throughout the event, giving attendees the chance to stop by between sessions and check out your products or services. It's low pressure, high exposure—perfect for making connections without staffing a booth. Grab this opportunity to stand out!

EXHIBITOR TABLES

MONDAY ACTIVITES

SANDBAR SUNDAE CELEBRATION

Join us Tuesday evening for the **Sandbar Sundae Celebration**—the ultimate treat for your taste buds! Indulge in a mouthwatering selection of vanilla, chocolate, and strawberry ice cream, topped with bananas, walnuts, and an assortment of candy bar pieces. Drizzle on some rich chocolate and caramel sauces, and finish it off with a fluffy dollop of whipped cream. Whether you're a fan of classic flavors or love mixing it up, this celebration promises a sweet and fun-filled experience for everyone! This event supports the David Reaves, Don Haden, and Bill Montgomery Scholarships in Alabama, and the Marie Daniel Scholarships in Louisiana.

ROAST OF RANDY HAYDEN

Get ready for the event of the year, a night hosted by Miss America Abbie Stockard – the **Roast of Randy Hayden!** You know him, you love him... or maybe you're just here for the sundae bar. Either way, you're in for a treat! After 25 years working for propane, Randy has become a staple to our industry. He has graced us with his wisdom, his unique sense of humor, and countless stories we'll never forget. The roasting will be during the ticket giveaway and silent auction, so bring your best (and most embarrassing) memories, because we're going to give Randy a send-off for the books! Get ready for laughs, gasps, and maybe a few tears (mostly from Randy).

TICKET GIVEAWAY & SILENT AUCTION

Enjoy our ticket giveaway with cash prizes and gifts—just be there when your number is called! Plus, check out the exciting items up for bid in the Silent Auction.

Ticket Giveaway:

- ****All registrations include One (1) Ticket per person.**
- **We encourage you to buy additional tickets on the registration form!**
- The last ticket out will receive \$1,000 in cash (additional prizes will be distributed throughout the drawing).

Silent Auction:

- We will have Silent Auction items up for bid.
- **Please consider donating an item to the auction. [Donation Form Attached.](#)**

TICKETS WILL BE COLLECTED AT THE DOOR FOR MONDAY & TUESDAY NIGHT'S EVENTS.

YOU CAN PURCHASE EXTRA TICKETS ON THE REGISTRATION FORM.

TUESDAY ACTIVITIES

BEACHSIDE FUN

Enjoy the perfect beach day with our exclusive setup, complete with chairs, umbrellas, and plenty of activities to keep you entertained. Relax in your own private area, whether you're soaking up the sun or diving into fun beach games and water sports. This is our most popular event, offering the ideal mix of relaxation and excitement for an unforgettable day by the shore!

\$45 per person. The registration fee includes ONE lounge chair, a shared umbrella and an assortment of snacks and beverages. The reservation will also include four kayaks or paddleboards.

GOLF TOURNAMENT

Join us for a tournament at Lost Key Golf Club, an 18-hole Arnold Palmer Championship course offering a top-tier golf experience. Redesigned in 2006, the par 71 course features Sea Dwarf Paspalum grass for excellent playing surfaces. With five sets of tees, it provides a unique challenge for golfers of all skill levels. Don't miss this exciting opportunity!

\$175 registration fee includes cart, green fee, range balls, boxed lunch and prizes.

IN-SHORE FISHING

Experience the thrill of inshore fishing, where the calm morning waters offer the perfect opportunity to reel in your catch of the day. Whether you're a seasoned angler or a beginner, this early adventure promises a peaceful, rewarding time on the water, surrounded by stunning views and abundant marine life. Don't miss the chance to start your day with a great fishing experience!

There will be 4 fishers per boat. The \$200 registration fee includes everything you need to fish and enjoy the day. Participants will need to meet at Zeke's Marina 30 minutes early.

GAME NIGHT

What better way to wrap up the convention than with delicious food and plenty of fun! Enjoy a fantastic dinner buffet, followed by an exciting, family-friendly show that's sure to entertain everyone.

Get ready for an epic showdown at our 1776-themed party, where it's all about patriotism, fun, and a friendly but competitive game of Family Feud! Louisiana vs. Alabama—who will come out on top? Dress to impress as your favorite forefather, political figure or in your best red, white and blue. Join us for a lively, all-American battle of wits with plenty of laughs and bragging rights on the line! This event is packed with excitement, perfect for the whole family to enjoy.
